

LEATHER CARE CRÈME

Nourishes & Protects: Leather Care Crème is a unique blend of natural oils used to replenish those oils in leather which deplete over time. Periodic use will protect the leather, keep it supple and improve stain resistance.

Light Cleaning Action: Leather Care Crème contains light cleaning agents but is primarily designed for use on clean leather. Soiled leather should be pre-cleaned using Concept Leather Soap & Conditioner. (#331)

Plastic Conditioner: Leather Care Crème is also suitable for use as a Silicone Free Conditioner for enhancing the appearance of vinyl dashboard, trim fascia and other interior/exterior plastic parts.

Solvent Free: Zero VOC

Directions for Use:

NB. Do not use on suede or similar finishes. Always test first on an inconspicuous area to check that the leather surface is colourfast and water resistant.

Shake Container Before Use: Apply Leather Care Crème with a clean dry soft cotton cloth. Rub gently into the surface until the crème is dispersed. Allow to penetrate surface. Buff with dry cloth, to reduce level of gloss as required.

Frequency of Use: In temperate climate conditions, 2 treatments per year should be sufficient to maintain the suppleness of the leather. In more severe ie hotter, drier climates use regularly but sparingly to keep leather at it's best condition.

Typical Specification :

- Composition : A fragranced aqueous emulsion of leather conditioning natural oils.
- Appearance : Pale Beige Emulsion
- Odour : Typical Leather
- F.P. : N/A
- S.G. : 0.95
- Shelf Life : 2 Years minimum in unopened containers
- Packaging : 1L Bottles

CODE: 325
